

C-Print Evolution Plus Textile Vinyl

Soft & stretchy printable material

Description

Heat seal material, specifically formulated for ink jet solvent and eco solvent based inks – printing and cutting systems.

Evolution print™ is a high opacity material, thin digital media incredibly soft to the hand; its stretch-and-rebound is simply amazing.

Adhesive Polyester backing.

Basic Information

Due to the many different base materials available on the market, the following heat transfer instructions are given as guideline only:

Temperature: 160°C

Time: 15"

Pressure: high

Application Instructions

- 1) Print and cut the material. It is advisable to cut details NOT SMALLER THAN 1 cm.
- 2) Weed the exceeding material
- 3) Carefully laminate the **Siser transparent polyester T.T.D.** (adhesive, transparent polyester, resistant to high temperatures) on Evolution Print, then remove immediately from the backing.
- 4) Heat apply
- 5) Remove application tape **hot**. Should you use other application tapes, follow the manufacturer's instructions
- 6) We recommend you to wait a few hours **before stretching** the garment

Suitable for

Cotton, polyester, poly-cotton blends and Lycra

Not suitable for treated and dyed garments (sublimation inks)

Washing: (wait 24h after the heat transfer)

40°C Max. – wash inside out - do not use bleach or other aggressive chemical agents

Dry-cleaning : no

Tumble drier : not advisable

N.B. : all information given in this sheet are based on our experience

We recommend to always perform a test before starting standard production

We offer a wide range of **Grafiflex Textile Vinyl's** which enables us to offer something suitable for every budget and application.
