

Graflex PU Textile Film

Thinner Film Ideal For Multi-Layering

Graflex PU textile vinyl is a thermoweldable PVC FREE material for cad cut applications on to non-siliconized textiles. The material is much thinner than standard Graflex material, also having these other characteristics: high washing resistance, easy cutting, weeding and application. Because of the thinness of the material, excellent performance can be achieved with multi-layered applications.

Application Instructions

- 1) **Cut in REVERSE**
- 2) **Heat apply with its own polyester backing**
- 3) **Remove polyester backing when cold**

Due to the many different base materials available on the market, the following heat transfer instructions are given as guideline only:

Temperature: 150°C
Pressure: Low

Time: 10 – 15 sec.
Washable to: 80°C
